Subject: Surface water samples collected during the June 2007 Tetra Tech expanded site inspection	
<p style="text-align: center;"><b>PROJECT NOTE SUMMARY</b></p> <p>All surface water samples collected during the June 2007 Tetra Tech expanded site inspection (ESI) at the Barite Hill property were collected at the surface of the water by partially submerging the sampling container into the water (Refs. 32, pp. 9, 10; 40, p. 6). The logbooks state that the surface water samples were collected at various depths; however, this is incorrect. The logbook notes from the June 2007 Tetra Tech ESI are contained in Reference 40, Appendix C.</p>
